DECKING

Create a leisure space isn't a luxury

New products New technology

Unlike classical composite decking (1st generation), co-extrusion decking (2nd generation) performs much better on physical properties.

It's more waterproof, oil and stain resistant, dimensionally stable and durable.

With the latest technology we can make dual colors on a single board and more colors & finishes are available

PRIMARY BENEFITS

- WATERPROOF
- ECO-FRIENDLY
- ANTI-SLIP
- FIRE-RETARDANT
- ANTI-UV
- ANTI-WARP
- ANTI-MOLD
- TERMITE-FREE
- ANTI-CRACK

DIY TILE

One of the advantages of composite deck tile is the convenience of installation. Its interlocking design makes it easy to install or remove. They can be used to decorate either interior or exterior space, and they will spare you from maintenance annoyance for the years to come.

2 sides locking base

With 2 sides locking base, you can install the deck tiles in a same direction easily.

4 sides locking base

With 4 sides locking base, you can install the deck tiles in either direction freely.
